For its 60th meeting the US-based Business History Conference took to the German city of Frankfurt am Main to discuss „The Virtues and Vices of Business“. With close to 200 presentations in panels from a far range of topics including, for example, „Queer Business in Postwar Britain and America“, „Business Lobbying and Public Relations“ and „Gambling and Gaming“, the conference drew international scholars from the field of Business History and beyond. Given the massive scope of the conference, the words that follow will not attempt to give a general overview, and instead merely summarize one of the broader themes debated at this conference: knowledge.

The importance of „knowledge“ in the field of business was thoroughly discussed in several panels. One example was „Transatlantic R & D“. ANDREW GODLEY (Reading) opened the panel with a presentation of his joint research project with David Leslie-Hughes (London) on the German Pharmaceutical Company E. Merck and the American Merck and Company. Godley advanced an argument towards adjusting the periodization for R & D (Research and Development). In his view the German chemical industries were leaders in the field not only until after World War One, but well into the 1930s. In his case study of the two Merck companies he argued that they were not two separate entities after 1919, but rather that the American company benefitted from a hidden technology transfer with the German Merck in Darmstadt at least until the late 1930s.

ELLAN SPERO (Cambridge, MA) addressed the related question of how the US chemical industry was eventually able to compete with its German counterpart, by looking at the research institutes Mellon and MIT. She argued that it was mostly due to the combination of teaching and research and also a result of the connection between academia and companies that enabled the development towards R & D in the US. Spero argued that these ideas were conceived in the States around 1900, and were largely based on firsthand experience American scientists had gathered in Germany.

MARGARET GRAHAM (Montreal) also looked at the academic-industrial connections in the field of chemistry, but this time from a more comparative angle. She argued strongly to reconsider levels of success in R & D. “More money did not necessarily lead to better research,” she pointed out, and emphasized how the 1930s were the most productive years for R & D. Whereas the 1960s – usually seen as being more successful – although featuring more hands-on results, neglected the important groundworks of theoretical chemistry.

In his comment on the session ERIC HINTZ (Washington DC) concluded: „American R & D had a German DNA, but also coevolved with academic development in the US.” Therefore he urged historians not to see this transfer as a one-way street, but rather also to investigate the repercussions of other scientific communities on the German model.

A similar topic, albeit with a very different scope, was covered in the „Technology Transfer“ panel. Here speakers focused mainly on the transfer of machinery from developed regions or countries to lesser developed parts of the world. NATHAN D. DELANEY (Cleveland, OH) took the example of two German mining companies operating in 19th-century Mexico. He argued that a decisive factor for the possible impact of a foreign company was often limited by boundaries set by the states concerned. Furthermore, he added that the migrant’s mentality was less important in this context than the institutions that facilitated this exchange. Accordingly he concluded: „A foreign company is as virtuous as the government of the country it operates in.“

The following speakers, NADIA FERNÁNDEZ DE PINÉDO, RAFAEL CASTRO (both Madrid) and DAVID PRETEL (Barcelona), asked if, in fact, multinationals already ex-
isted in the 19th century, and if so, what was their role in technology transfer. They presented the case of Derosne&Cail, a French company supplying machinery for sugar planters in Cuba. Their research as presented suggested that Derosne&Cail was indeed an early multinational that managed to create a network of „tested machinery” through the distribution of machinery to some planters who, in turn, marketed them, but who also helped spread the necessary knowledge for the operation of the machines. The conclusion of the paper was that this strategy became globally successful because technology transfer in itself is not sufficient, without the experience of on-hand, trained technicians.

KORINNA SCHÖNHÄRL (Duisburg) looked at a case of European transnational business. The Lake Copais Company operated at the Greek lake of the same name using European capital for drainage to create land for agricultural use. Due to instability of agricultural prizes in the 19th-century, the investment proved rather risky. Schönhärl described how these circumstances led to a risk management that consisted of the development of an expert culture aimed at assuring (potential) investors. At the same time the cultural implications of Greece at the core of European civilization were used to market the project. It was ultimately the mix of profit expectations, risk management, but also sentimental emotions that drew investors to finance the project.

In her comment SIMONE MÜLLER-POHL (Freiburg) concluded that all presentations were linked by the question: „What drove foreign investors and companies into the transnational sphere?” For the papers presented she argued that a broad range of motifs was addressed, ranging from policy and infrastructure to colonial fantasies. The main question, however, whether there was a factor beyond profit expectations, maybe even a philanthropist idea, was hotly discussed but ultimately left unanswered.

Another panel dealing with „knowledge”, though somewhat more implicitly, was the panel on „Colonial Intermediaries”. CHRISTINA LUBINSKI (Washington DC) presented Human Resources (HR) policies of German Multinationals active in the Indian market between the 1920s and 1940s. According to Lubinski, not only race relations influenced the work of the HR department. Additionally she highlighted the importance of knowledge about the societal positions of potential employees. By trying to recruit a trained workforce of Indians – at least in parts – the companies always had to be weary of British/White colonial rule. At the same time, the different interests of stakeholders in Germany also had to be taken into account, which often created a challenging environment for HR Management in India.

ELISABETH KOLL (Cambridge, MA) in the same panel presented her research on competition between multinationals for „Managerial Talent” in China from the 1890s to the 1930s. Working in a huge emerging market within a rather complex colonial context, the companies were forced to rely on Chinese intermediaries. Eventually the competition between mostly German and British companies led to knowledge and technology transfer from the firms concerned to their Chinese intermediaries, which in turn helped shape the local market.

Moving on to a more recent timeframe from 1940 to 1960, STEPHANIE DECKER (Birmingham) presented the case of Imperial Business in Ghana and Nigeria. Linking back to Lubinski’s talk, Decker explained that the companies acting in Western Africa often looked to India and drew their knowledge on Human Resources Management (HRM) from there. At the same time however, a major debate about „colonial development” led to an increased interest of the Imperial state in African workers and their welfare. This in turn led to differing and often competing strategies not only from the companies involved, but from the Imperial state in relation to workers’ treatment.

ANDREW SMITH (Liverpool) also focused on racial relations within the Hongkong and Shanghai Banking Corporation (HSBC). He demonstrated that the bank was ultimately a British tool used in Asia. Its workforce was divided and, as such, rigidly separated into the British executives on the one hand and the local „native workforce” on the other. According to Smith, the end of this separation clearly started with the onset of the Second World
War, when the bank and its employees had to adapt to the changing political landscape. Taken together, all of the presentations showed how multinationals acting in foreign (colonial) countries had to cooperate with local intermediaries. They were reliant on local staff at most levels in their workforce, and therefore they were using local networks and local knowledge as well as passing on knowledge and technology to the local actors. These developments helped shape and change the businesses strategies themselves as well as local markets in which they operated.

The opening of the panel „Intellectual Property Regimes” moved away from case studies in favour of a much broader approach to intellectual property as well as its political and financial implications. GERBEN BAKKER (London) opened the panel with an overview covering the period from 1750-2000. In his ambitious project he is trying to link R & D with popular culture „products” by measuring their monetary value. He attempts to find out the value of songs like „Happy Birthday” but also of brands and even people such as movie-stars and their „brand value”.

STEVEN WILF (Storrs, CT) presented on the legal history of intellectual property in 19th-century US. With the enforcement of patent law in the US so called „patent carpet-baggers” entered into a completely new field according to Wilf. Now everyday objects from agricultural technology like gates, drive wells and barbed wired came under scrutiny. In Wilf’s view, therefore, the law itself became a technology.

PATRICIO SÁIZ and RUBÉN AMENGUAL (both Madrid) followed up with a presentation on patents in relation to the Four-Stroke Engine Business. According to them, German, French and Spanish patents in the late 19th century were useless in as much as they failed to give any valid information about construction details. In comparison, they argued that Anglo-Saxon patents were much more precise. Even people registering the same patent in differing countries followed the national conventions, thus giving different information on the product. The results were that in many cases alleged patent infringements had to be brought before a court.

Knowledge was taken as an exemplary topic because it offers an interesting perspective to the Business History Conference since many papers dealt with the German/US industrial competition that is strongly linked with R & D. The broader topic chosen by the organizers, „The Virtues and Vices of Business”, was related to in most papers, albeit often implicitly. The conference itself, with its participants mainly from the US and Germany, but also Europe and beyond, was an appropriate forum for debate on business and its influence on society and vice versa. To examine this up-to-date topic in a historical context was certainly a merit of the conference.

Conference Overview:

Workshop I: Multilingual Business History: Past, Present, and Future
Patrick Fridenson (École des Hautes Études en Sciences Sociales)
Andrew Popp (University of Liverpool)
Philip Scranton (Rutgers University)
Ray Stokes (University of Glasgow)

Workshop II: The Promise and Perils of the Euro
Youssef Cassis (European University Institute)
Jeffrey Fear (University of Glasgow)
Mary O’Sullivan (Université de Genève)
Karín Sagner-Kaiser (Deutsche Bundesbank)

Welcome Address
Uwe Becker (City Treasurer, Frankfurt am Main)

Keynote Address
Frank Partnoy (University of San Diego), Financial Scandals through the Lens of Probability and the Law

1. A Reconsidering Deregulation
Chair and Discussant: Margaret Levenstein (University of Michigan)

William R. Childs (The Ohio State University), Bringing Economics Back In: Business History, Political History, and the Natural Gas Industry

William H. Becker (George Washington University), Theory and Empiricism: Economics and Business History

Marc Levinson (Independent Scholar), 1973

© H-Net, Clio-online, and the author, all rights reserved.
and the Roots of Deregulation

1.B Transatlantic R&D
Chair: Sabine Bernscheider-Reif (Merck Group); Discussant: Eric Hintz (Smithsonian Institution)
David Leslie-Hughes (Huck Foundation) / Andrew Godley (University of Reading), E. Merck of Darmstadt and the Origins of Industrial Research Capabilities in U.S. Pharmaceuticals at Merck & Company
Ellan Spero (Massachusetts Institute of Technology), Institutes for Innovation: Bridging Industry and Academy at Mellon and MIT
Margaret Graham (McGill University), German Scientific Connections in Early U.S. Materials R&D

1.C Queer Business in Postwar Britain and America
Chair and Discussant: Daniel Rivers (The Ohio State University)
Justin Bengry (McGill University /Birkbeck College, University of London), A Tale of Two Markets: Accessing the Queer Consumer in Pre-Decriminalization Britain
David K. Johnson (University of South Florida), DSI: The 1960s Gay Consumer Culture Revolution

1.D National Industrial Policies I
Chair and Discussant: Alfred Reckendrees (Copenhagen Business School)
Michael Heller (Brunel University), „For who can bear to feel himself forgotten?“ The General Post Office and the Birth of a British Brand Icon, 1930-1939
Sarah Dietz (University of Bradford), The Temptation to Advance Private Interests at the Expense of Public Duty: The Role of the British Consul in Facilitating FDI in the Nineteenth Century
Joyman Lee (University of Missouri), Chinese Debates on Industrial Policy and the Influence of Japan, 1900-1940

1.E Corporate Social Responsibility and Its Antecedents
Chair and Discussant: Kenneth Lipartito (Florida International University)
Teresa da Silva Lopes (University of York), British Responsibility and the First Forms of Fair Trade
Jeffrey Yost (University of Minnesota), Access Control Software, Corporate Responsibility, and the Origin and Early History of the Computer Security Industry
Kristoffer Jensen (Danmarks Industri museum / Syddansk Universitet), Conflicting Interests? Danish Manufacturing in China Today and the Challenge to Be Both Competitive and True to Company Tradition

1.F Failed Boosterism
Chair and Discussant: Shane Hamilton (University of Georgia)
Robrecht Declercq (European University Institute), The Risks and Benefits of Local Business Entrenchment: The Fur Industry as a Local Production System in Leipzig, 1918-1933
Francesca Fauri (Università di Bologna), The „Mussolini Hometown Effect“ on Local Industrial Development: The Case of Forlì
David Koistinen (William Paterson University), Business and Regional Economic Decline: The Political Economy of Deindustrialization in Twentieth-Century New England

1.G Policy and the Structure of Markets
Chair and Discussant: Richard R. John (Columbia University)
Torsten Feys (Universiteit Gent), The Battle for the Migrants: The Introduction of Steamshipping on the North Atlantic and Its Impact on the European Exodus
Laura Phillips Sawyer (Harvard Business School), Institutionalist Economics and Managed Competition: The U.S. Experiment with a Coordinated Market Economy, 1920-1940
Simone Selva (Università degli Studi di Napoli L’Orientale), Money Market, Industrial Credit, Foreign Trade: American Assistance Policies and the Shaping of West Euro-
pean Consumer Societies from Bretton Woods through the 1970s Recession

1.H Business Scandals
Chair and Discussant: Christopher McKenna (University of Oxford)
William J. Hausman (College of William & Mary), Howard Hopson’s Billion-Dollar Fraud: The Rise and Fall of Associated Gas and Electric, 1921-1940
Alessandra Tessari (Università del Salento) / Giambattista Rossi (University of East London), From Calciomercato to Calciopoli: Illegal Practices in the Italian Football Industry, 1950-2006

2.A The „Multinational Dilemma“ in the 1970s
Chair and Discussant: Christian Kleinschmidt (Philipps-Universität Marburg)
Thomas Hajduk (Universität St. Gallen), „An Instrument of Moral Persuasion“? Multinational Enterprises and International Codes of Conduct in the 1970s
Alex Gertschen (Philipps-Universität Marburg), Mexico and the „Multinational Dilemma“ in the 1970s: Views from the Global Periphery
Francesco Petrini (Università degli Studi di Padova), Public Interest, Private Profits: Multinationals, Governments, and the Coming of the First Oil Crisis

2.B R&D Networks
Chair and Discussant: Philip Scranton (Rutgers University) / Phillip Bradford (Independent Scholar) / Paul Miranti (Rutgers University), Prelude to Statistical Quality Control at the Bell System: Walter Shewhart, Millikan’s Oil Drop Experiment, and the Problem of Telephonic Interference
Michael Schneider (Universität Düsseldorf), Systems of Values in Conflict? Scientific Research in a Pharmaceutical Firm

2.C Evolution of a Global Supply Chain
Chair and Discussant: Neil Forbes (Coventry University)
Oscar Granados (Universidad Jorge Tadeo Lozano), Bankers, Entrepreneurs, and Bolivian Tin in the International Economy, 1900-1932
Mats Ingulstad (Norges Teknisk-Naturvitenskapelige Universitet), Banging the Tin Drum: The United States and the Quest for Strategic Self-Sufficiency in Tin, 1840-1945
Nick White (Liverpool John Moores University), The Trouble with Tin: Governments and Businesses in Decolonizing Malaya

2.D Business and Wartime Patriotism
Chair: Uwe Spiekermann (German Historical Institute-DC); Discussant: Stephanie van de Kerkhof (Universität Mannheim)
Christina Ziegler-McPherson (Empire State College), Keuffel & Esser: German-American Entrepreneurship and Opportunity in Wartime
Lars Heide (Copenhagen Business School), Virtues and Vices of IBM’s Subsidiary in Nazi Germany
Marten Boon / Ben Wubs (Erasmus Universiteit Rotterdam), Property, Control, and Room for Maneuver: Royal Dutch Shell and Nazi Germany, 1933-1945
Corinna Ludwig (German Historical Institute-DC), „Confiscation is always a dirty business“: Wartime Expropriations of German Companies in the United States

2.E Responding to Gender Discrimination in America
Chair and Discussant: Mark Rose (Florida Atlantic University)
Johannes Steffens (Universität Heidelberg), The Virtue of Corporate Citizenship: Equal Employment Opportunity Activism of American Business Elites in the 1960s
Susan Yohn (Hofstra University), Cooperation over Confrontation? Working Collec-
tively or Individually? Debating the Problems of Women in the Corporation
Pamela Walker Laird (University of Colorado Denver), Where the Legislative Model Failed: Civil Rights Enforcement and the Glass Ceiling

2.F The Business of Health
Chair and Discussant: Dominique Tobbell (University of Minnesota)
Liselotte Eriksson / Lars Fredrik Andersson (Umeå Universitet), Exploring the Mechanisms of Gender Discrimination: Swedish Mutual Health Insurance, 1901-1910
Kevin Moos (University of California, San Francisco), Is Good Health „Good Business”? Perspectives from the History of Medicine on the Virtues of Business, Profits, and Public Health
Elizabeth Ann Semler (University of Minnesota), Public Health or Industry Health? U.S. Government Responses to the 1970s Dietary Cholesterol–Heart Disease Controversy

2.G Investors, Creditors, and Information
Chair and Discussant: Susie J. Pak (St. Johns University)
B. Zorina Khan (Bowdoin College), Related Investing: Corporate Ownership and the Dynamics of Capital Mobilization during Early Industrialization
Claire Brennecke (Yale University), Strategies of Information Acquisition: Evidence from Nineteenth-Century U.S. Credit Reports
Janette Rutterford (Open University) / David Green (King’s College London) / Carry van Lieshout (University of Nottingham) / Dimitris Sotiropoulos (Open University Business School), Spreading the Net: Distance, Shareholding, and the Geography of Risk in England and Wales, 1870-1935

2.H „Piracy“ on Sea and Land
Chair and Discussant: Mark Jakob (Universität Marburg)
Fei-Hsien Wang (University of Cambridge), Protecting Private Interests under the Shadow of the Law: Shanghai Booksellers’ „Copyright” Regime, 1905-1949
Karen Cannell (SUNY), Fashion Copying as Virtue or Vice: An Examination of André Studios as a Case Study

3.A Transnational PR and Marketing after World War II
Chair and Discussant: Ingo Koehler (Georg-August-Universität Göttingen)
David B. Sicilia (University of Maryland), Public Relations Revolution after World War II: Counter-Organization and Transnationalism
Fabio Lavista (Università Bocconi), Public Relations, National Development, and Foreign Policy: Italian State-Owned Enterprises in the 1950s
Shawn Moura (University of Maryland), Try It at Home: Avon and Gender in Brazil, 1958-1975

3.B Historicizing „Open Source“
Chair and Discussant: Alessandro Nuvolari (Università degli Studi di Pisa)
Joris Merces (Universiteit Gent), Stages of Openness in the Development of Photographic Technology in Nineteenth-Century America
Gabriel Galvez-Béhar (Université Lille 3), Knowledge Sharing in War and Peace: Patents, Inventors, and the Arms Industry in France, 1816-1914
Ann Johnson (University of South Carolina), Subversion or Cooperation? The Exchange of Proprietary and Patentable Knowledge among Corporate Engineers

3.C Financial Markets in the Early Twentieth Century
Chair and Discussant: Janice Traflet (Bucknell University)
David Hochfelder (University at Albany / SUNY), Microfinance: A Transatlantic Progressive Reform
Natacha Postel-Vinay (London School of Economics), Debt Dilution in 1920s America: Lighting the Fuse of a Mortgage Crisis

3.D Cartels and Competition Policy
Chair and Discussant: Martha Olney (University of California, Berkeley)
Josef Lilljegren (Umeå Universitet), Head-on Harmful Cooperation—Why Firms Cooperate When It’s Bad for Them: The Case of Swedish Property Insurance, 1855-1949

Malin Dahlström (Göteborgs Universitet), Why Did the Swedish State Regard the Cement Monopoly as Beneficial?

3.E Going Green
Chair and Discussant: Ole Sparenberg (Universität des Saarlandes)

Frank Oberholzner (Allianz SE Munich), Insurance as a Successful Adaptation Strategy against Natural Hazards: The Development of German Crop Insurance, 1800-1914

Yin Li (Georgia Institute of Technology) / Matt Hopkins (University of Massachusetts Lowell), The Rise of the Chinese Solar Photovoltaic Industry: Firm, Government, and Global Industry

3.F Labor Relations
Chair and Discussant: Karl Lauschke (Technische Universität Dortmund)

Irina V. Shilnikova (Higher School of Economics, Moscow), Labor Conflicts in Russian Industries at the End of the Nineteenth and Beginning of the Twentieth Century: Entrepreneurs’ Strategies

James Wolfinger (DePaul University), Humanizing the Capitalistic System: Thomas Mitten, the Philadelphia Rapid Transit Company, and the Labor Question in the Early Twentieth Century United States

Allison Elias (University of Virginia), A Cooperative Approach to Employee Relations: Office Automation, Worker Alienation, and Human Resources in the 1970s and 1980s

3.G Technology Transfers
Chair and Discussant: Simone Müller-Pohl (Universität Freiburg)

Nathan D. Delaney (Case Western Reserve University), Transnational Liberalism: Two German Mining Firms in Nineteenth-Century Mexico

Nadia Fernández de Pinedo / Rafael Castro (Universidad Autónoma de Madrid) / David Pretel (Universitat Pompeu Fabra), An Earlier Experience of Transfer of Knowledge and Technology: The Case of Derosne & Cail in Cuba in the Nineteenth Century

Korinna Schönhärl (Universität Duisburg-Essen), The Lake Copais Company: Risky Foreign Investment in Greek Agriculture in the Nineteenth Century

3.H Exploiting the Information Revolution
Chair and Discussant: Bernardo Bátitz-Lazo (Bangor Business School)

Benjamin Schwantes (German Historical Institute-DC), Selling E-Mail to America: MCI Mail and the Commercialization of Computer-Based Electronic Communication

Mirko Ernkvist (Ratio: Näringslivets Forskningsinstitut), The Discontinuous Shift to Digital Exchanges in Sweden, 1985-1992

4.A Intellectual Property Regimes
Chair and Discussant: Margaret Graham (McGill University)

Gerben Bakker (London School of Economics), Public Goods or Business Opportunities? Ideas, Intellectual Property Rights, and Business History

Steven Wilf (University of Connecticut), Patents, Markets, and Discontent in Late Nineteenth Century America

Patricio Sáiz (Universidad Autónoma de Madrid) / Rubén Amengual (Independent Scholar), Invention, Imitation, Patent Practices, and the Four-Stroke Engine Business

4.B Race and Plantation Management
Chair and Discussant: Caitlin Rosenthal (Uni-
versity of California, Berkeley)
Justene G. Hill (Princeton University), Slave Economies and the Paternalist Ideal in Ante-bellum South Carolina

Ferry de Goey (Erasmus Universiteit Rotterdam), Consul General Ferguson and the Ethics of the Chinese Coolie Trade, 1850s-1890s

Henderson Carter (University of the West Indies, Cave Hill), Business Practices and the 1937 Revolt in Barbados

4.C Shaping the Welfare State
Chair and Discussant: Francesco Boldizzoni (Università degli Studi di Torino)

Carol-Ann Hudson (McMaster University), Business and Poverty: A Modern History of Business and Social (Liberal) Reform in Canada

Natascha van der Zwan (Amsterdams Instituut voor Arbeids Studies), Capital Scarcity, Ideational Change, and the Pension Free-for-All

Michael McCarthy (Max-Planck-Institut für Gesellschaftsforschung), Neoliberalism from Below: Evidence from the Rise of 401(k)s

Thomas Paster (Max-Planck-Institut für Gesellschaftsforschung), Business and the Welfare State: Bringing Power Back In—A Literature Review

4.D Reevaluating FDI
Chair and Discussant: Kristoffer Jensen (Danmarks Industrimuseum / Syddansk Universitet)

Adoración Álvaro-Moya (Colegio Universitario de Estudios Financieros) / Núria Puig (Universidad Complutense de Madrid), Did Inward FDI Promote Spanish Managerial Talent? A Study of Two Companies, Bayer and ITT, 1880-1975

Pierre-Yves Donzé (Kyoto University), Multinational Enterprises and the Globalization of Medicine: Siemens and the Construction of Hospitals in Emerging Markets in the 1950s and 1960s

Duncan Ross (University of Glasgow), Electronics in Scotland: Savior or Villain?

4.E Environmental Challenges
Chair and Discussant: Ray Stokes (University of Glasgow)

Matthias Mutz (RWTH Aachen Universität), The Ecological Basis of the Industrial Enterprise: Resource Management in the German Pulp and Paper Industry, 1850-1930

Thilo Jungkind (Universität des Saarlandes), Becoming Evil: The Seveso Chemical Incident and Hoffmann-La Roche, 1976-1996

David Celetti (Università degli Studi di Padova), Industrial Growth, Management Strategies, and Death in the Workplace: The Case of the Officine Meccaniche Stanga

4.F Varieties of Corporate Philanthropy
Chair: Peter Miskell (University of Reading)

Elizabeth Harmon (University of Michigan), The Commercialization of Charity: Progressive Era Debates about Philanthropic Foundations

Kenneth Bertrams (Université Libre de Bruxelles), The Circulation of Corporate-Based „Scientific“ Philanthropy in Europe and the United States, 1880-1940
